Objectives and Investment Policy

The Sub-Fund is actively managed. The objective of the Sub-Fund is to gain exposure to global equity and fixed income markets by mainly investing through UCITS/UCIs including ETFs. The Sub-Fund is managed with a risk aware approach and is diversified across regions and sectors. The indirect maximum exposure to Russia and China through all the different fund investments is limited to 20% on China and 10% on Russia. "Crescita equilibrata" (Balanced Growth) recalls the need for capital growth but with a balanced approach in terms of allocation, to which the Sub-Fund responds through a multi asset allocation with equity weight between 40% and 60%.

The Sub-Fund can invest with a global approach in the following asset types indirectly through UCI/UCITS including ETFs:

- i. Shares/units in UCITS within the Fidelity Funds range of collective investment schemes within equities and fixed income (including high-yield bonds).
- ii. Shares/units in exchange traded funds (ETF) within the Fidelity range.

The Sub-Fund will invest indirectly in equity and fixed income markets in a balanced approach with the flexibility to tilt allocations according to market conditions and within the defined ranges of 40-60% for each asset group.
- iv. At all times, the maximum exposure level to derivatives is capped at 100% of the Sub-Fund total net assets.

v. If the Investment Manager considers this to be in the best interest of the investors, and notably for defensive purposes, the Sub-Fund may also, hold, up to 20% of its net assets, in liquid assets such as (but not limited to) cash deposits, and/or Money Market Funds.

The Sub-Fund is not managed in reference to a benchmark.

The Share Class's currency is EUR. The Sub-Fund's reference currency is EUR.

The aforementioned investment strategy corresponds for the investors with a medium investment risk profile. The risk category is neither a target nor a guarantee and may shift over time.

This Sub-Fund is addressed to investors who intend to benefit from the global financial market trends with a medium level of volatility.
