A Sub-Fund of Gestielle Investment Sicav Class R LU0757813851 Fund managed by: Anima SGR S.p.A.

Objectives and Investment Policy

Objective To increase the value of your investment over the long term.

The Fund is actively managed without reference to any benchmark.

Portfolio Securities The Sub-Fund will primarily take long and/or short positions in the global equity markets. The Sub-Fund may also invest in global fixed income, both investment grade and sub investment grade, and currency instruments. The portfolio's net exposure to equity market risk (long positions less short positions) is between -25% and 50%.

Investment Process The investment strategy consists in managing a portfolio of long positions on companies considered attractive. The Investment Manager employs an active management approach, using an internal quantitative methodology. The Manager uses a set of Value, Growth, Quality, Momentum and other economic indicators to generate an investment portfolio based on the Manager's global security selection and asset allocation models. The Investment Manager will use a tactical allocation to manage the net exposure to the equity market. For this purpose the Sub-Fund may also invest in derivatives for both hedging and non-hedging strategies, including to implement short positions and to obtain synthetic exposure to companies or markets.

Designed For Investors who seek for gradual capital growth and accept the possibility of capital loss in the medium term.

You can place orders to buy or sell Sub-Fund shares at any time. Orders received on any given Luxembourg business day before 16:30 Luxembourg time will be processed at that day's share price.

The Sub-Fund issues only accumulation shares (shares in which any income earned is added to the share price).

Terms to Understand

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Shares Securities that represent a share in the business results of a company.

Exposure Any means of investing whose performance is correlated with the performance of the securities or markets in question.

Emerging markets Nations whose economies and/or securities markets are less well established.

Risk and Reward Profile

Lower potential risk/reward Higher potential risk/reward
Not risk-free

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The fund has been classified in risk/reward class 4 because its internal volatility limit is equal to or greater than 5% and less than 10%.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify

everyday risks and could trigger other risks, such as:

Liquidity risk: the risk that, in certain market conditions, financial instruments may not be readily sold, unless substantial losses are incurred.

Credit risk: the risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

Counterparty risk: the risk that the counterparty to a transaction of OTC derivative financial instruments or of efficient portfolio management techniques will not fulfill the commitment assumed at the deadlines set by the contract; this risk can be mitigated by receiving guarantees from the counterparty.

Risks associated with investing in derivative financial instruments: the risk that the strategies implemented through the use of derivative financial instruments may cause substantial losses.
