The Sub-Fund combines a thematic approach and a quantitative equity selection approach within a multi-asset allocation strategy, unrelated to benchmark constraints. Both thematic and quantitative approach to equity selection are based on a fundamental analysis of companies, even though they use different drivers. The combination of the two approaches is an efficient solution to ensure a more stable long-term performance. Such instruments can be used provided they are contracted with first class (please define "first class") financial institutions specialized in this type of transactions.

viii. At all times, the maximum exposure level to derivatives is capped at 100% of the Sub-Fund total net assets.

ix.
